13	TILT DOWN	------	------	------	•

** The Model CM1 mount provides for the programming of up to three (3) preset mount positions.

*** The Model PXR mount provides for the programming of up to four (4) preset mount positions.

To use the mount position preset feature:

1.) Move the mount to desired position using appropriate buttons on remote. (see table above)

2.) Press the "SAVE" button on remote to store mount preset.

3.) Press the desired "PRESETS" button on remote (1 through 4)

4.) Repeat steps 1 through 3 for each desired setting.

NOTE: Pressing the "HOME" button will return the mount to the the fully retracted (factory preset) position. The mount will retain all presets.

NOTE: If remote does not operate properly see the installation instructions provided with mount, or contact a Chief Customer Service Representative.
