

## **SLB-5800 HANGER BRACKET FOR PROXIMA DP 5800, 6800, 6810**

Unpack carton and check contents:

- (1) SLB-5800 Plate
- (2) #7 X 5/8" long, sheet metal screw
- (6) Thumb Nuts

### **INSTALLATION INSTRUCTIONS**

1. Turn projector upside down.
2. Carefully remove two (2) #7 x 3/8" long phillips head sheet metal screws located on rear vertical face of projector just above the part line at either side. Note, each screw is in a 7/16" diameter recess.
3. Tip handle up toward bottom of projector and carefully place the u-shaped tabs of the SLB-5800 Plate around the handle at front and down over rear face. Note! The self clinching nuts, 3/8" diameter, on inside surface of bracket should be aligned with the 7/16" diameter recesses in rear vertical face of projector.
4. Install two # 7 x 5/8" sheet metal screws through clinch nuts and into chassis, tighten moderately.
5. See RPA and/or Smart-Lift™ Instructions.
