

Pitch-Adjustable Wall Mount (PRO)

ARCHITECT SPECIFICATIONS:

The pitch adjustable plasma display mount shall be a Chief Manufacturing Inc. PRO-XXX, or equivalent, to affix a plasma display to a vertical mounting surface. The mount shall be installed in the location indicated on the architectural drawing/plans. The mount shall be constructed primarily of 14 gauge steel with black finish. It shall be designed to support a plasma display weighing up to 150 lbs. (68.04 Kg), shall easily mount a plasma display in portrait or landscape mode with latched/unlatched indicator, and shall be adjustable between 0 and 15 degrees of tilt adjustment in landscape mode. The mount shall be low profile (max. 1.63" depth) and shall be able to be secured in place for touch screen compatibility. It shall be designed to mount on 16" on center studs and tested to successfully secure the plasma display to the mount in compliance with GR-63-CORE earthquake testing methods for United States earthquake zone IV. The mount shall include lockable latches and lateral shift through the use of accessories by the same manufacturer. Assembly and installation shall be performed according to the instructions provided by the manufacturer.
