

Plasma Static Wall Mount (PSM)

ARCHITECT SPECIFICATIONS:

The plasma static wall mount shall be a Chief Manufacturing Inc. PSM-XXX, or equivalent, to affix a plasma display to a vertical mounting surface. The mount shall be installed in the location indicated on the architectural drawing/plans. The mount shall be constructed primarily of 13 and/or 14 gauge steel with black finish. It shall be designed to support a plasma display weighing up to 150 lbs. (68.04 Kg) and shall easily mount a plasma display with latched/unlatched indicator. The mount shall be low profile (max. 1 - 2" depth dependent upon plasma display) and shall require no bracket assembly. It shall be designed to mount on 16" on center studs and tested to successfully secure the plasma display to the mount in compliance with GR-63-CORE earthquake testing methods for United States earthquake zone IV. The mount shall include lockable latches and lateral shift through the use of accessories by the same manufacturer. Assembly and installation shall be performed according to the instructions provided by the manufacturer.
