

Universal Flat Panel Display Wall Mount

ARCHITECTS SPECIFICATIONS:

The universal flat panel display wall mount shall be a Chief Manufacturing Inc. UPM-1400/2400, or equivalent, to affix any of a variety of plasma display models to a vertical mounting surface. The mount shall be installed in the location indicated on the architectural drawing/plans. The mount shall be constructed primarily of 12 gauge steel with black finish. It shall be designed to support a plasma display weighing up to 150 lbs. (68.04 Kg) and shall easily mount a display in landscape mode or, for 14" pattern models, in portrait mode. The mount shall be low profile (max. 1 - 2" depth dependent upon plasma display). It shall be designed to mount on 16" on center studs and tested to successfully secure the plasma display to the mount in compliance with GR-63-CORE earthquake testing methods for United States earthquake zone IV. The mount shall include lockable latches and lateral shift through the use of accessories by the same manufacturer. Assembly and installation shall be performed according to the instructions provided by the manufacturer.
